Flexible LED Strip Tape

Our Flexible LED Strip Tape is a linear strip of low power LEDs encased in a flexible, clear epoxy resin. The thin diameter and extremely low profile form factor allow it to be installed in areas too confined for traditional rope light products. Wide angle SMD LEDs placed every 2/3” result in homogenous and even light distribution without shadows or gaps. For mounting ease, each section is supplied with 3M double sided tape already installed on the product. Each section comes with wire leads so your LED Strip Tape is ready to connect to your DC power source.

An excellent choice for:
- Cove lighting
- Under cabinet lighting
- Glass cabinets
- Wine racks
- Closets

Features
- Flat and low profile form factor
- Extremely flexible
- Clear water-resistant epoxy cover
- Wide Angle SMD LEDs
- Low power consumption
- 3M Double-Sided Tape

Benefits
- Fits in tight & narrow spaces
- Very easy to handle & apply
- Interior or exterior applications
- Blended Illumination (without shadows)
- Saves energy
- Simple installation (fasteners not required)

Flexible Strip Tape LED

Advanced LED Solutions

Imtra is at the forefront in the development of LED products for today’s marine market. We are proud to offer a family of first-in-class high flux LED lights that combine proprietary drive electronics with advanced optics and efficient thermal management techniques. Imtra PowerLEDs let builders and boat owners enjoy all the advantages of the latest LED technology, backed by Imtra’s expertise and support. To see our full line of LED products, visit www.imtra.com.

Product Details

Visual

Viewing Angle

120°

LED Color Options

| Warm White 2900K | Blue | Cool White 5500K |

Mechanical

Cutability 2” (12V) or every 4” (24V)

Mounting Method 3M Tape or flexible clips

Available Lengths 4’, 8’ or 16’ reels

Tape Dimensions 2.77mm (0.12”) height 8.47mm (0.33”) width

Electrical

Power Consumption 1.25W per ft.

Voltage 12 or 24VDC
