

BOAT WORLD REVOLUTION

Zipwake, the world's first economical Dynamic Trim Control System, incorporates a state of the art series of durable, fast-acting interceptors, eliminating the well-known trim problems of planing and semi-planing boats between 20-60 feet. The system is fully automatic and significantly enhances performance, fuel economy, comfort and safety when accelerating, turning or running in a seaway.

KEY FEATURES

- Zipwake is a fully automatic and active trim control system.
- Dynamically eliminates uncomfortable and dangerous boat pitch and roll.
- Automatically minimizes wave resistance and saves fuel.
- Built-in quality, simplicity and easy expansion, yet affordable.
- 5-10 times faster than conventional trim tabs.
- Built-in GPS, 3D-Gyro and 3D-Accelerometer.
- Supports system integration with external devices via NMEA 2000 network.

NOW EVEN MORE DYNAMIC Chine Interceptors

Chine interceptors provide a unique means of maximizing pitch and roll motion control by utilizing the furthest outboard surfaces of the hull bottom for lift generation.

Intermediate Interceptors

When space between multiple outboards or sterndrives is tight, an intermediate interceptor offers a viable alternative for additional pitch and roll motion control not possible with a straight interceptor without degrading propeller performance.

Interceptors provide less resistance compared with trim tabs.

Gimbal Bracket

A useful installation option for the Series S Control Panel. The bracket can be positioned at any angle between 0 and 360°, plus it comes with a cable gland that allows for waterproof, open-sky installation.

SMART RIDE CONTROLLER

Model	CP-S
Weight	0.22 kg (.49 lbs)
Mounting	Flush or surface
Supply Voltage	12-32 V DC
Power Consumption	10 W max
Waterproof Rating	IP67/IP64 (front/back)
Operating Temperature	-20° to +85°C (-4° to +185°F)

- GPS
- 3D ACC
- 3D GYRO

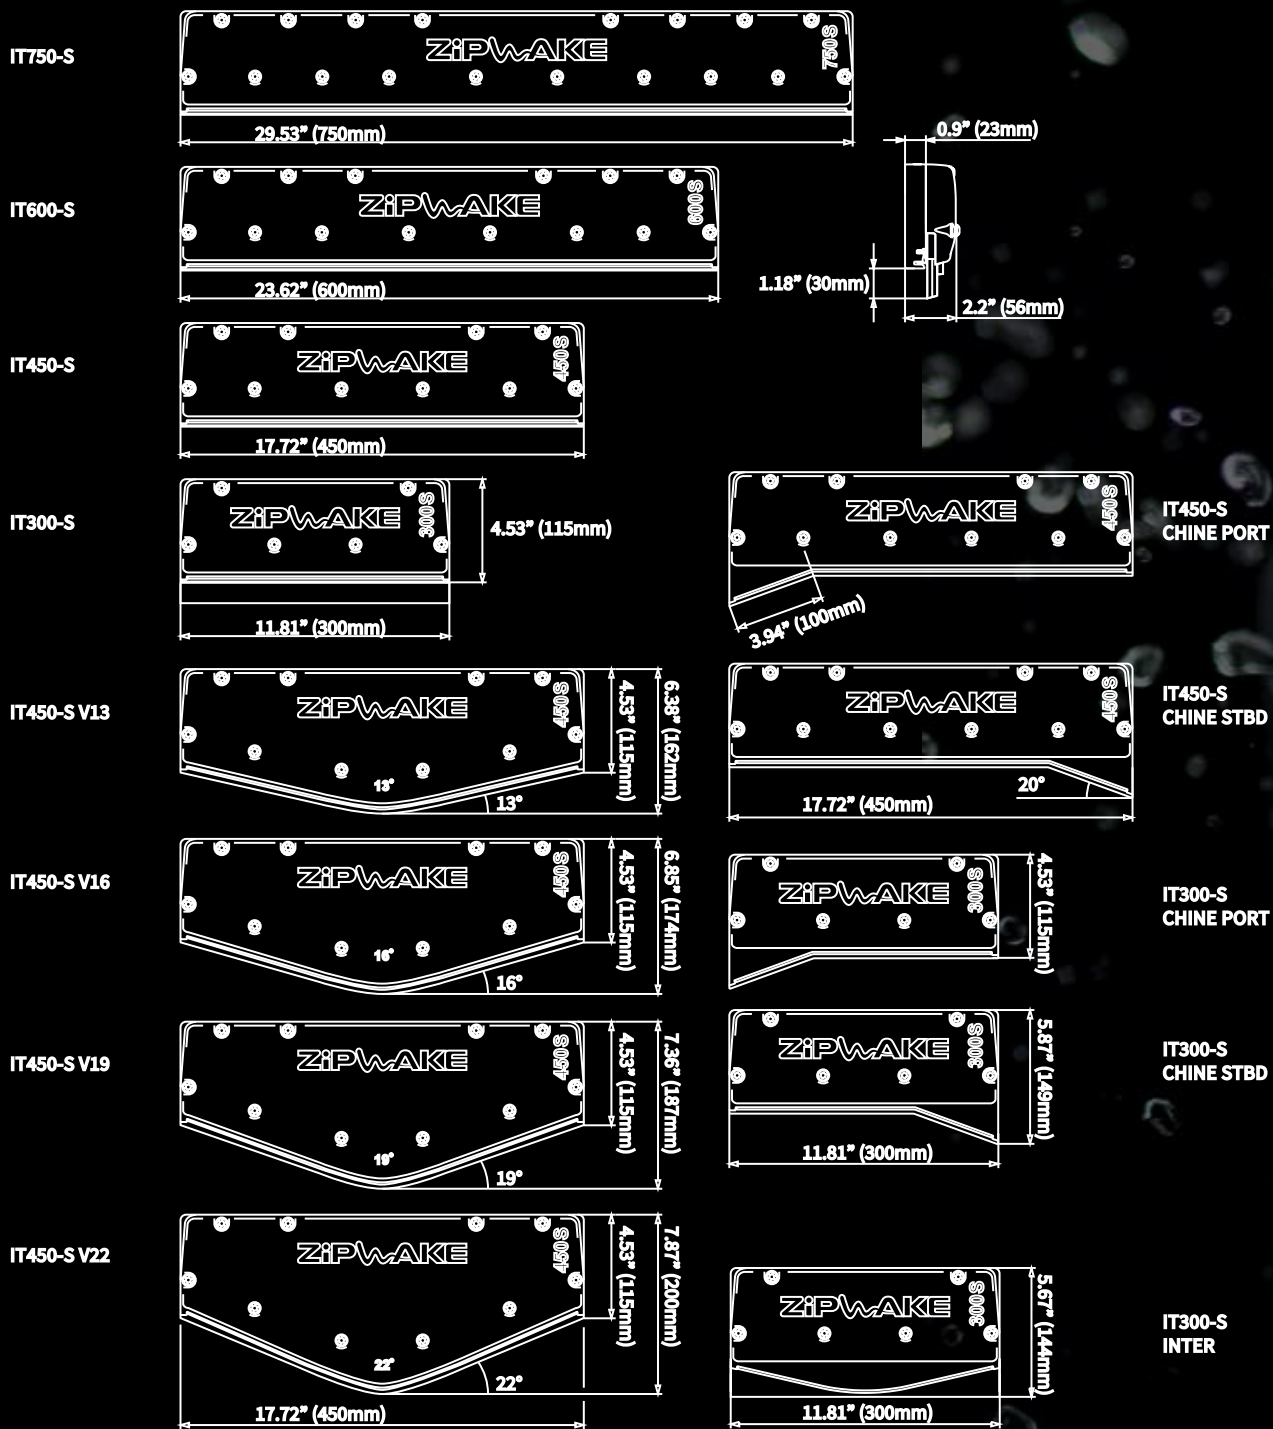

V-SHAPED INTERCEPTORS

V-shaped interceptors for centerline mounting are perfect for filling the gap between twin outboards or sterndrives, as well as dual propeller tunnels.

Four V-shaped models cover deadrise angles effectively between 11° to 24°.
