

TRANBERG® Control Panels

TEF 2613 Commander Series Searchlight Control Panel
for Searchlight TEF 2650 Halogen/Xenon/LED

Safe Area

TEF 2613 is a control panel for searchlights. With one panel you can control up to 8 searchlights. This means that the need of space on the bridge desk is considerably reduced, but still the user-friendliness is high.

This panel can only be used together with searchlights which are adapted to this kind of technology. The searchlights and the control panels are connected to a common RS-485 network, which reduce the wiring on the vessel to a minimum.

Application

- For flush mounting
- For control of up to 8 searchlights
- Up to 16 panels may be connected to the network
- May be used with any kind of light source
- TEF 2618 radio control interface may be connected to the network

Features and benefits

- Compact size
- Dimmable backlighting
- Large push buttons for easy and secure operation
- Easy installation
- Operated at a safe 24 VDC
- Automatically detects the number of searchlights and panels; Can therefore be expanded at any time
- "Home" function allows the user to predefine a default position, and return to this position with a single press of this button
- "Group" function allows the user to control any number of searchlights simultaneously

Approvals and certificates

- Mounted in polycarbonate enclosure IP56

Technical Data

Material:	Black anodised aluminium. Lexan front.
Input voltage:	24 VDC
Terminals:	Plug in screw terminals and RJ-45
Ingress protection:	IP22
Operating temperature:	0° to +40°C
Dimensions:	168mm x 96mm x 55mm
Weight:	0,36 kg
