

# NORSAP 1100

INTEGRATED

## PRODUCT INFORMATION

The **Norsap 1100** series offers a modern design solution with comfort and ergonomics in mind. The seat features various adjustments to allow for the best ergonomic position when seated. Standard adjustments are the backrest, seat position on glide rails, 360° rotation, gas-dampened height adjustment, flip-up armrests and fold-up footrest. The chair is mounted at a 150 mm x 200 mm oval column or a 100 mm diameter column, creating a firm base for the footrest and seat. The flanged base is designed for permanent deck mounting but can also integrate with an optional deck rail solution.
