Imtra's new electronic wiper switches are designed to incorporate numerous operational features into one small compact stand alone unit. These switches can be easily installed in standard dashboard switching systems (like Carlingswitch). These units are offered for one or two wiper motors in 12 or 24V and are compatible with all Exalto wiper motors.

### Features and Benefits

- Multifunction switch for one or two wipers (10-30VDC).
- Compact stand-alone unit
- Fits standard dashboard switching systems
- Easy installation
- 5 speed settings (low, high, plus 3 levels of intermittent)
- Smart wipe/wash capabilities
- Switches work with all models of the Exalto motors
- Dimmer input
- 2-Wiper unit will operate both wipers synchronized or independently

### CT41 Wiper Switch Technical Specifications

Power Supply: 10-30VDC  
 Internal Fuse: 4 Amp  
 Stand by current: 20mA

### Item Number

EX210341  
 EX210342
