Imtra is Your Source

No marine LED lighting installation is complete without a quality switching system. For the best results, choose a reliable switching system with an intuitive interface for seamless control of your yacht's lights. Imtra is your source for the industry's most popular decorative switching system: Vimar®. We are pleased to offer a full selection of Vimar products, including switching devices and cover plates for the marine market.

The Vimar Collections

Designed and manufactured in Italy, Vimar switching is available in three collections: **Eikon**, **Arké** and **Idea**. Each distinct series boasts over 200 functions (switches, dimmers, outlets, USB ports) with a wide variety of color plate choices in many configurations.

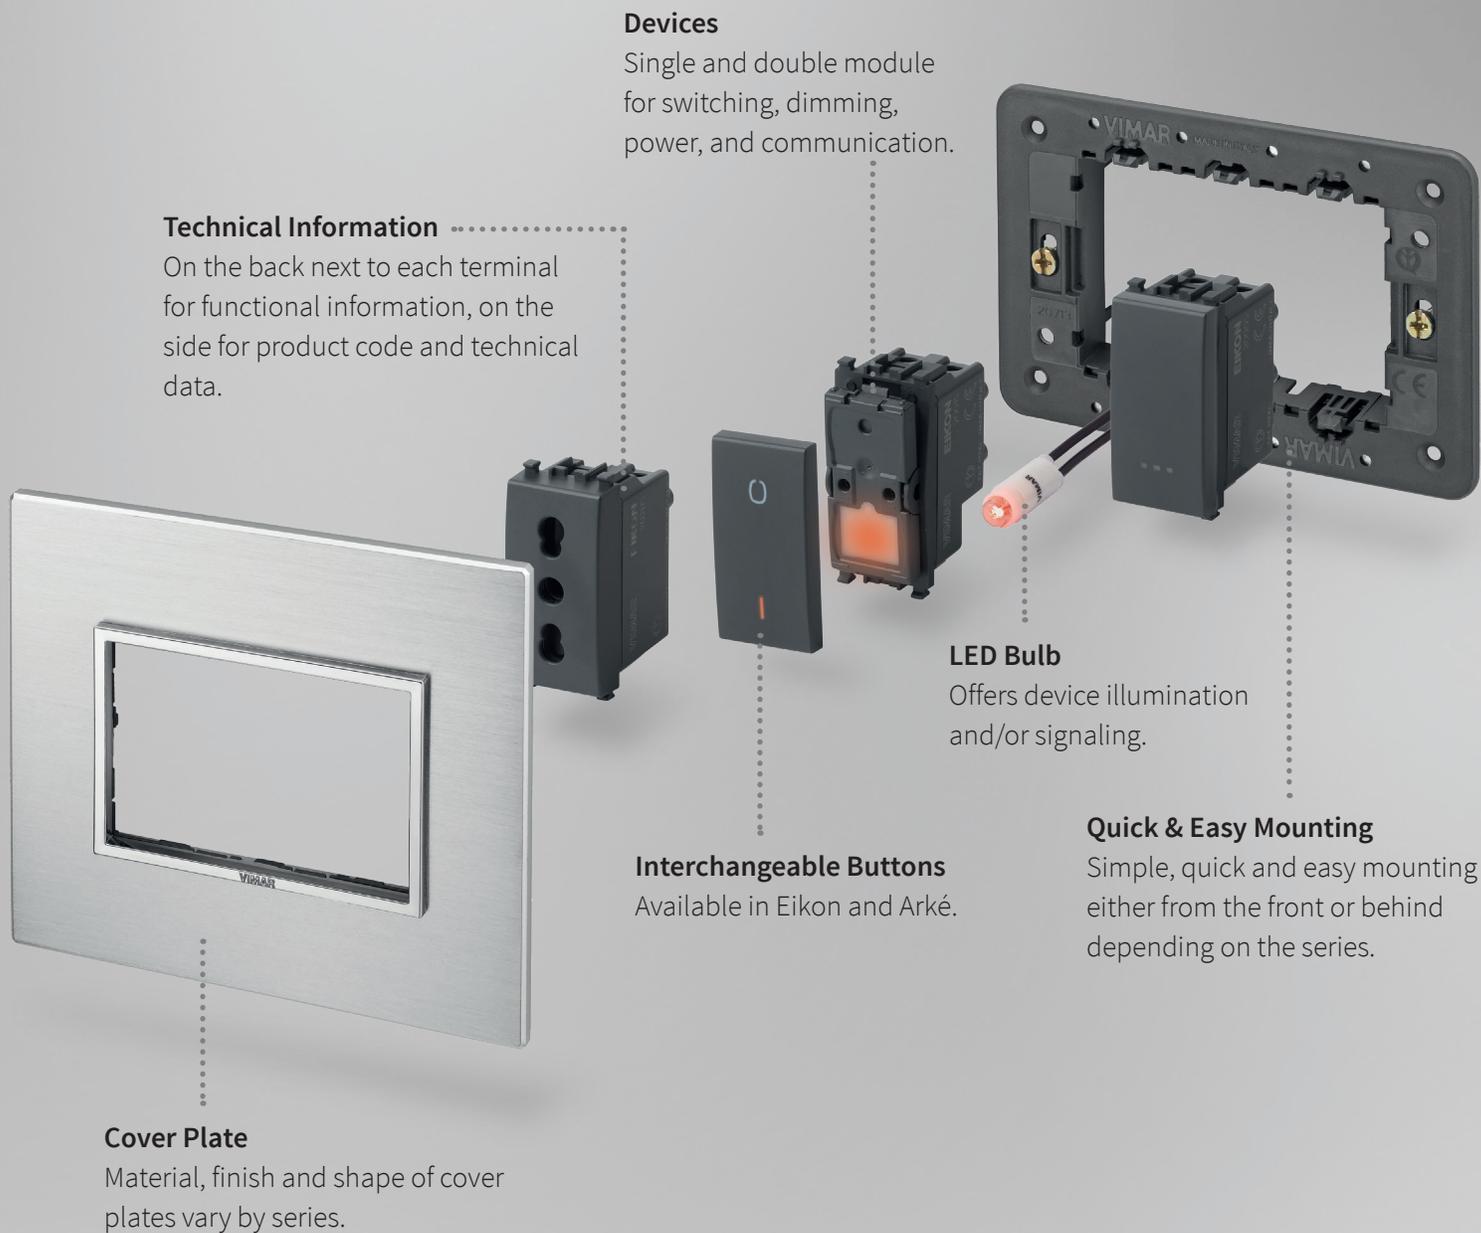

Product catalogs are available for download at imtra.com.

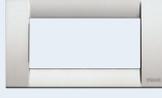

THE SYSTEM

Modular Features

The modularity of Vimar switching is illustrated with this take apart diagram.

Module Availability

Modules	EIKON	ARKÉ	IDEA
1	AVAILABLE		
2			
3			
4			
6	N/A	N/A	
7			N/A

Global Versatility

Wherever you are in the world, Vimar has devices to fit your needs, including sockets to meet different standards, modular controls and cover plates.

Media Options

If you're looking to install the latest flat-screen TV or plug in and charge your tablet, smartphone or laptop, Vimar has a variety of sockets for many different types of media.

EIKON

No matter where in the world you are located, Eikon has you covered. With a variety of different modular controls, cover plates and standards, the Eikon range is sure to have exactly what you are looking for. Eikon is an exclusive, top quality range of unique systems.

Benefits

- Three device colors
- Quieter switch activation
- Interchangeable buttons with discreet illumination
- Global versatility with selection of outlets, sockets, USB and HDMI
- Optional LED bulbs available to illuminate switches

Eikon **Evo**

Modern Elegance

Ultra Slim Profile

Evo stands out without actually standing out. The range is known for its axial buttons and slim silhouette that only protrudes from the wall a few millimeters.

Button Colors

Available in Anthracite Grey, White or Next Silver.

Button Customization

Removable buttons make laser engraving simpler. Contact Imtra for more details.

Eikon **Chrome**

Distinguished Quality

Inner Chrome Frame

An eye-catching new definition of style where detail is supreme. Chrome features are gleaming and sleek, with a distinctive inner chrome frame that encases the buttons and controls for an all-around polished look. Available in round or square.

Eikon **Total Look**

Total Harmony

Three Colors

Total Look equals simplicity. Buttons, devices, cover plates and frames are completely color coordinated in either White, Anthracite Grey or Next Silver. Available in round or square.

Low voltage USB charging is easy with our DC-DC converter

USB Chargers

120V: White and Next Silver also available

12/24V

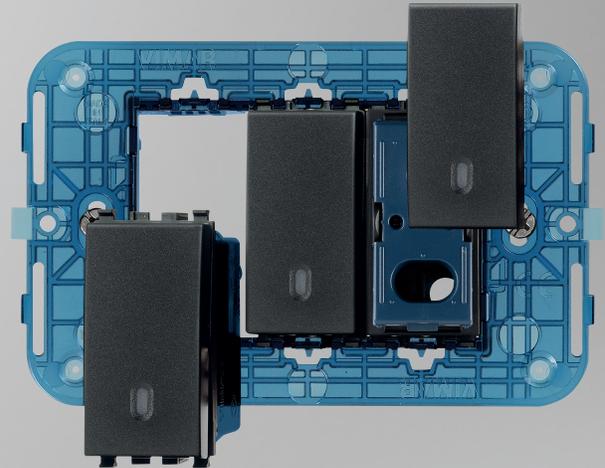

ARKÉ

Arké is the decorative yet economical solution to your switching needs. A combination of contemporary design and modern materials is what sets Arké apart.

Benefits

- Two device colors
- Seven different cover plate materials
- Contemporary design
- Optional LED bulbs available to illuminate switches

Patented Design

Arké features a Vimar patented design that makes the removal of buttons and switches fast and simple.

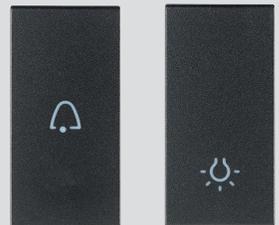

Button Colors

Available in Anthracite Grey and White.

Button Customization

Buttons are available with laser screen-printed symbols chosen from our customization library.

Arké Square

Precisely Linear

Linear Profile

Neat corners and straight edges give Arké Square its sleek, appealing look.

Arké Round

Softly Curved

Smooth Appearance

Subtly stylish thanks to its softly rounded corners.

Low voltage
USB charging is

IDEA

For two decades, the Vimar Idea Series has been the overwhelming choice of decorative switching for boat builders worldwide. Its enduring qualities and timeless design extend the popularity of the Vimar Idea Series to this day. With Idea, the installation solutions are numerous and freedom of choice is maximized!

Benefits

- Two device colors
- Four different cover plate materials
- More than 200 device functions
- Reduced (size) modules available
- Optional LED bulbs available to illuminate switches

Idea Square

Rigorous and Enduring

Straight-Line Features

Squared corners and straight edges define the look of Idea Square. A worthy match for today's contemporary furniture designs.

Many switch devices may be illuminated

Device Colors
Anthracite Grey or
Idea White.

Device Styles
A variety of styles are available including a reduced module size.

Idea Round

Soft and Subtle

Soft Radius Edges

Its rounded corners make it a comfortable choice for living areas featuring upholstered furniture, cushion fabrics, and puffy pillows. A fitting choice for staterooms and general sleeping quarters.

Idea Plates for Panels

Discrete and Compact

For Fitting One or Two Devices

The two configurations, either one or two module, will accommodate either one or two devices. Available in square or round.

Low voltage USB charging is easy with our DC-DC converter

USB Chargers
120V

12/24V

BY-ME MARINE

By-me Marine® provides the ultimate in on-board command and control. This automated system is intuitive, easy to program, and simple to install. With its marinated mechanical features and conformal coated electronics, the system is designed to be compatible with any type of sea-going vessel. Complemented by the Eikon and Idea series, the Vimar® By-me Marine® system blends seamlessly with any interior setting.

Benefits

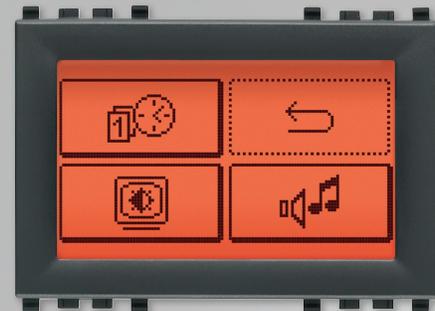

- Automated control for lights, blinds & shades
- Programmable scenes for coordinated control of lights and blinds
- User interface via 10" touch panel, traditional switches, SMS, web server. Mobile apps for iOS, Android, and Windows phones/tablets
- BUS cable backbone means fewer cables, less weight, smaller size conduit and greater safety

Connect

Touch Screen

Easy-to-program Bus system coordinates management of all functions from a single supervision point, allowing for extremely effective regulation and control.

Control

User Options

This easy-to-use control unit allows for simple configuration and setup.

Rear View and Connections

Fixed terminals prevent movement during periods of shock and vibration.

Technologically Advanced Automated Control System

Communicate

Monitor/Mobile Phone

System is controllable via web app for iOS, Android, or Windows compatible devices while on board or away from your vessel. All functions are integrated into an autonomous system which continually adapts to changing demands.

Clean

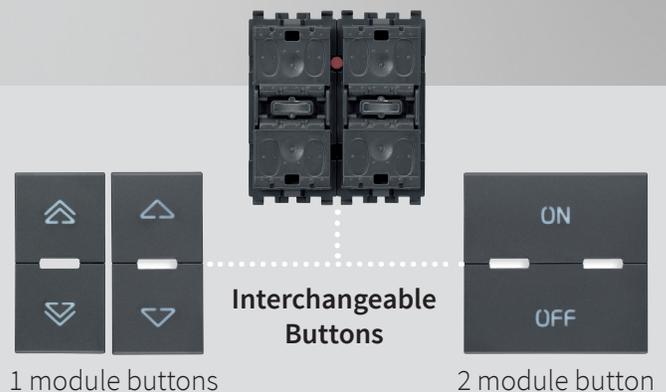

Tactil Plates

A technologically advanced pure crystal touch screen that activates with touch function through proximity sensor.

Front View

- A (A) Configuration push button
- B (B) Inner conformal-coating electronic circuit
- C (C) Special buttons suitable for the marine environment

Warranty

Vimar switching products carry a 3-year warranty effective upon delivery of the goods. At its discretion, Imtra will either replace or repair any product in this catalog within its specified warranty period if found to be defective through faulty material or workmanship provided that no attempt has been made by the customer to tamper with, rectify, dismantle, or alter the product in any way. Imtra specifically disclaims any implied warranties, merchantability or fitness for a specific purpose and will not be liable for any direct, indirect, incidental or consequential damages. Imtra's total liability is limited to repair or replacement of the product. The warranty set forth is inclusive and no other warranty, whether written or oral, is expressed or implied.
