

imtra[®]
MARINE LIGHTING

ADVANCED LED SOLUTIONS

The Trusted Source for Quality Systems

Imtra is the premier systems supplier to boat builders, service yards, and boat owners worldwide. We are proud to provide the finest equipment to recreational marine, commercial marine and non-marine industries. With 65 years of experience, we remain committed to providing our customers with the world's best products and the highest level of service and support. To see our full range of products, please visit www.imtra.com.

C O N T E N T S

	Basics of LED Lighting What you should know before choosing lights for your boat.	4
	Imtra Marine Lighting Designed and assembled in the USA, this range of products has a solution for both interior and exterior applications.	5
	BCM Lighting BCM downlights are specifically designed for marine applications using the latest in LED technology.	15
	Prebit German styling, precision engineering and innovative features. Our selection of Prebit products go together to create a progressive look in yacht interiors.	24
	Cabin Old World charm and Danish craftsmanship. With Cabin fixtures, we provide solutions that integrate today's technology into high-end traditional housings.	32
	French Extremely efficient products for marine and automotive. French engineers unique form-factors that provide solutions to common lighting challenges.	34
	Utility & Indirect Lighting A variety of high performance engine room and utility lights, along with LED rope lighting and LED strip tape to complete every installation.	42
	Dimmers, Power Converters & Voltage Stabilizers Dimmers and other electrical accessories to optimize your lighting system and ensure a lifetime of high performance.	48
	DHR Navigation Lights & Searchlights A new standard for intelligent searchlight solutions and enhanced visibility at sea, designed to reduce operational and maintenance costs and improve functionality.	52
	Product Index & Reference Looking for a particular type of light? Our Product Index is organized by type.	54

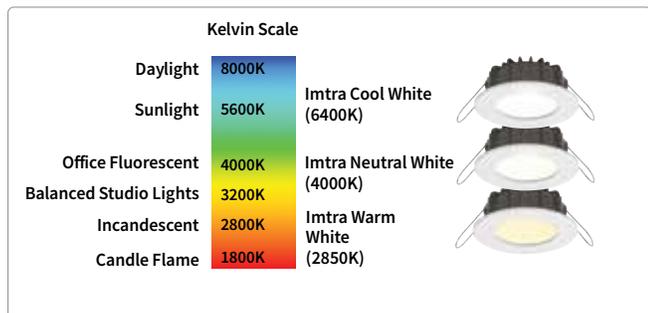

What you should know before choosing your **LED** lights.

When you are looking to buy an LED light for your boat, it is more like buying a new TV or computer than “just a light”. LED fixtures include circuit boards and a host of technologies that enhance performance and ensure that they will maintain that performance for many years. Here’s what you need to know before you buy:

Color Choice

LED lights are offered in a wide range of colors. Some fixtures even offer multiple colors from the same fixture. Unlike older technologies such as halogen and incandescent, LEDs can come in a range of different tones of white (as well as colors like red, blue or green).

The shade of white you choose is important as it will have a major effect on how spaces feel - and how objects appear. This is called “color temperature” which is a measurement in degrees Kelvin (K) that indicates the color hue of a specific type of white light source.

Cool White lights do a great job of enhancing the appearance of white gelcoat and light woods found in exterior spaces.

Neutral White lights, popular in European interior lighting design, provides slightly brighter illumination than Warm White without the bluish hue associated with Cool White. It is also proven to be an easier light to read by.

Warm White lights can bring out the best in yacht interiors with traditional darker woods and warmer fabric colors.

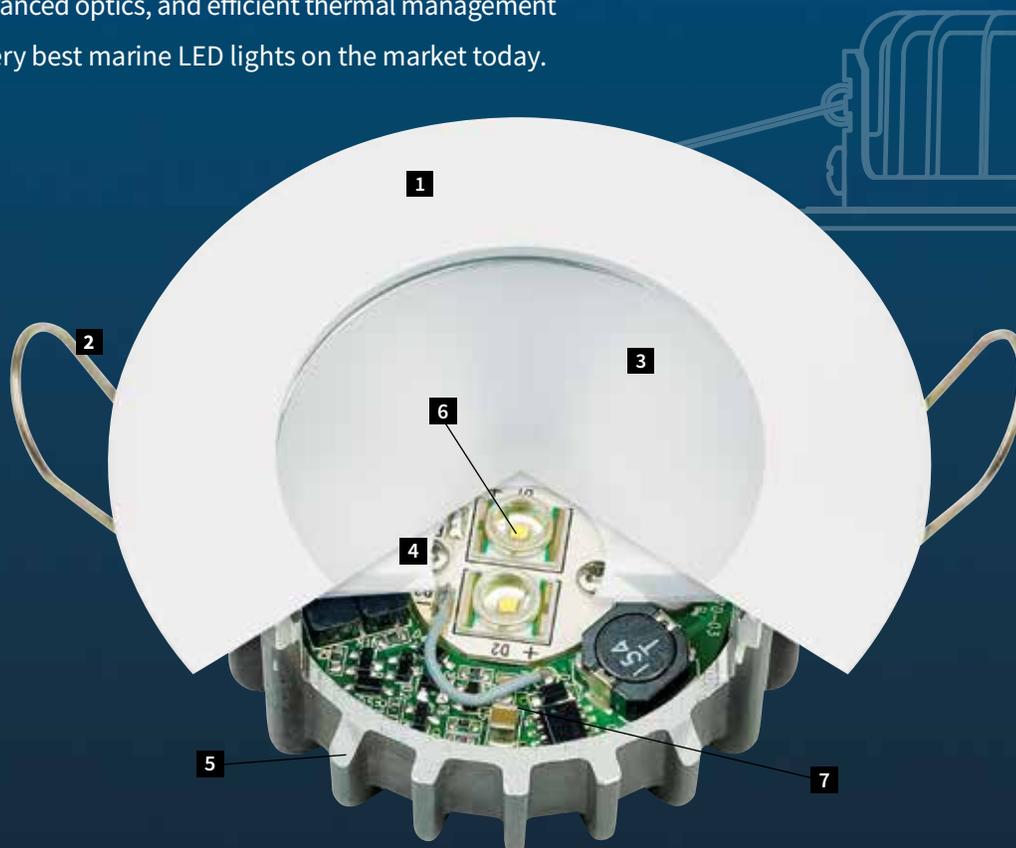

Warranty & Reliability

It is important to choose your LED manufacturer as carefully as you choose your fixtures. Make sure that you understand what level of support you can expect in case you have a problem. At Imtra, we proudly stand behind every product we sell. You can find detailed information about our product warranties on page 55.

Imtra is at the forefront in the development of LED products for today's marine market. As the "Anatomy of an Imtra LED" illustration shows, our LEDs combine high performance drive electronics, advanced optics, and efficient thermal management to create the very best marine LED lights on the market today.

Anatomy of an Imtra LED

- 1** Stainless steel trim ring for lasting quality finish
- 2** Stainless steel mounting springs for easy installation (screw-mount fixtures available)
- 3** Frosted glass and molded acrylic lenses for glare-free, blended light output
- 4** Highly reflective optic for superior optical efficiency and light distribution
- 5** Anodized, die-cast aluminum heat-sink housing maximizes surface area for optimal thermal management
- 6** High flux LEDs mounted on aluminum core board to maintain low junction temperature and extend lumen maintenance
- 7** Integrated driver electronics featuring:
 - Constant current control of LEDs
 - PWM dimming interface
 - Voltage spike/transient suppression
 - Conducted and radiated emissions filtering
 - Long life, high temperature components
 - Corrosion-resistant conformal coating

BLADE / CARVE / SURF

Key Features & Benefits

- Ultra-flat round stainless steel bezel design (Blade)
- Small diameter, low-profile molded square/square bezel (Carve)
- Designer-inspired molded square bezel (Surf)
- 2-wire power and dimming compatible with Imtra PowerLED PWM Controller
- Bi-color dimming with single momentary switch (requires 3rd wire)
- Integrated current-controlled drive circuitry
- Convenient spring mounting (no screws)

LED Colors

Single Color: Warm, Cool, Neutral

Bi-Color: Red/Warm, Blue/Warm, Red/Cool, Blue/Cool, Red/Neutral, Blue/Neutral

Specifications

ST. MAARTEN

Key Features & Benefits

- Hand-crafted blown glass shade in a variety of colors
- Available with round or rectangular base
- Integrated 1.0A USB charge port
- 355° lateral swivel (90° up/down)
- Accepts G4 halogen or LED bulb

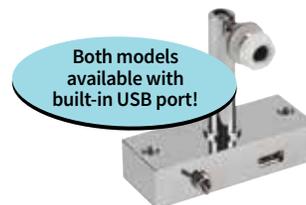

LED Colors

Single Color: Warm (halogen or LED bulb)

St. Maarten 3 – Rectangular Base

St. Maarten 2 – Round Base

Both models available with built-in USB port!

Specifications*

Beam angle (FWHM)	Omni-directional
Power consumption (LED bulb)	1.5W
Lifetime hours (70% light output) (LED bulb)	25,000
Halogen equivalency	10W
Input voltage	10-30VDC
Ingress protection (IP)	IP20

* Specifications are based on use with LED bulb (sold separately)

The unique, hand-crafted blown glass is made by America's oldest operating glass company. Master glassblowers at the Pairpoint Glass Company, now located in nearby Cape Cod, use the same time-tested techniques with some of the original tools that date back to the early 1800s when the company was founded in Boston, MA.

HOBART / VENICE

Key Features & Benefits

- Contemporary design, solid brass construction
- 180° swiveling head (90° up/down)
- No radiated heat – safe to touch
- Integrated current regulated driver
- Use with B15d incandescent or LED “Tower” bulb (Venice)
- Low profile half shade design (sold separately)
- Integrated switch included (Venice)

LED Colors

Single Color: Warm

Since 1959, the Benedetti family has built BCM lighting into a benchmark of excellence in the production of lighting fixtures. Their in-depth knowledge of market trends and technologies has allowed their range to expand year after year. All this leads to the creation of products that enhance the light and transform it into a successful work of art. Our selection of BCM fixtures include elegant downlights, chart and task lights, and courtesy lights. See the BCM Lite & Bright Catalog for additional sizes, LED color temperatures and finishes.

ORLANDO

Key Features & Benefits

- Downlights designed for marine applications
- Precision engineered for the latest LED technology
- Lightweight construction
- Available in both spring and screw mounting versions
- Minimal power consumption
- Less radiated heat than traditional light sources

LED Colors

Single Color: 3000k (2700k & 4000k on request)

WAVE NEONFLEX & MINI FLEX LED

Key Features & Benefits of Wave Neonflex

- LED Light Strip technology with PU protection
- Weather and UV resistant
- IP68
- High light transmittance
- Smooth surface
- Cold and hot resistance: performance stable in -40°C + 80°C

LED Colors

Single Color: 3000k (2700k & 4000k on request)

Specifications

- Four styles in two sizes available in top or side emittance
- Standard 3000K, with options for 6000K, 4000K, and 2700K

Key Features & Benefits of Mini Flex LED

- Slim Flex LEDs non-IP rated version is 5mm and IP65 rated version is 7mm wide
- 24VDC
- 10W/Mt
- 240LED per meter
- Can be used with aluminum profiles Mini Blade One A, Mini Blade Two B, & Mini Blade Three C
- 3000k standard (2700k & 4000k on request)

prebit®

Designed and constructed in Germany, Prebit yacht lights feature the latest in lighting technology and components made from the highest quality materials. Imtra's range of Prebit lights can provide a bright working light for cockpits and chart tables, or a soft, dispersed light for main cabins and berths. Our selection includes glass shade reading lights, brass-coil gooseneck chart lights, decorative wall sconces, and robust stainless steel downlights. All wall-mounted fixtures feature integrated digital dimmers with built-in momentary push-button control.

MUNICH / BREMEN

Key Features & Benefits

- Solid brass construction (Munich)
- Shade styles in solid or swirled glass or all metal (Munich)
- 350° adjustable swiveling head (Bremen)
- Built-in “soft-touch” dimming and control
- Integrated current regulated driver

CABIN DENMARK

Cabin Denmark lamps give your yacht a touch of luxury and distinctive Old World charm. Imtra's selection of Cabin lights includes the Cabin and Ocean reading light and the Ocean Chart lamp. Each model features the authentic Danish craftsmanship and attention to detail that have made Cabin lights a favorite of boat owners and builders for decades.

CABIN DANISH LIGHTS

Key Features & Benefits

- The original Cabin “Frigast” yacht lights
- Stainless steel construction
- May be fitted with high output G4 bi-pin LED bulb

Frensch Lighting is world-renowned for products that combine German ingenuity and design with high quality materials. Imtra is your source for Frensch lighting fixtures including surface-mount lights, recessed lights and flexible chart lights. They offer efficient, space-saving solutions while providing plenty of power to meet your needs. Frensch low profile surface-mount and recessed lights also feature the unique illuminated touch sensor – switching without any switches!

F - 4 & F - 26 CHART LIGHTS / F - 23

Key Features & Benefits

- Flexible umbilical (gooseneck) design chart lights
- TouchLED switch technology
- Bulkhead and table mount options
- Programmable “red” nightlight function (F-4 only)
- F-23 provides a subtle indirect wall-wash effect
- F-23 is compatible with DMS series dimmers

LEDs have revolutionized the way we illuminate our living environments on board. Nowhere else is the brightness and reliability of LEDs more appreciated than in work areas such as engine rooms and utility spaces. LEDs are impervious to shock and vibration, and since they require no warm-up period, full brightness is realized immediately, even when it's cold! All our utility lights, including those using traditional light sources, are specific for marine use, impervious to moisture, corrosion and soot.

HO LINEAR LIGHTS

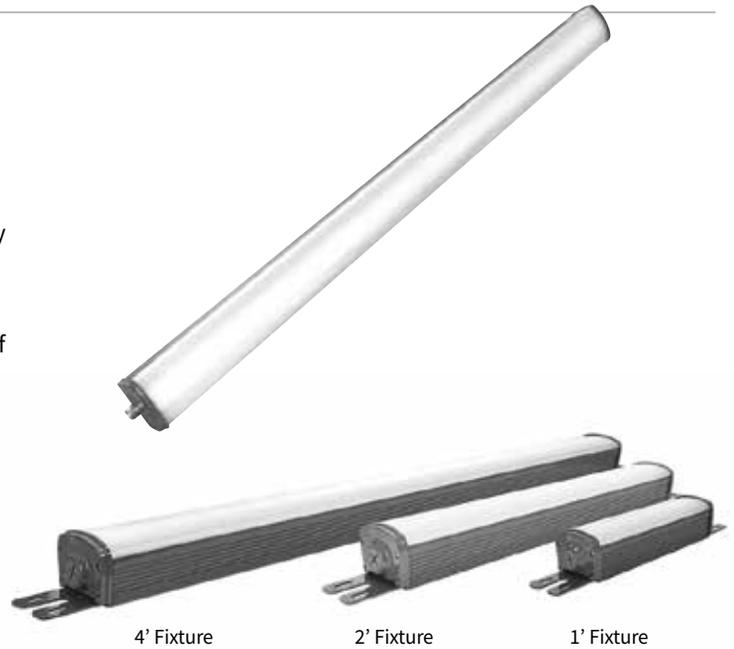

Key Features & Benefits

- Engineered to resist rust, corrosion, moisture, dust & impact
- Ideal for new builds and refit projects
- High quality LEDs and driver ensure high reliability and durability
- Available with Stainless Steel or Aluminum mounting brackets
- Shock and vibration proof
- Zero maintenance – no more bulbs to change, store or dispose of

SINGLE & DUAL CHANNEL POWERLED PWM DIMMERS

Single Channel Model

- Purpose designed for use with Imtra 2-wire and 3-wire single and bi-color PowerLEDs
- Operates a single circuit (7A max capacity)
- Permits control of single and bi-color lights on a single circuit
- May be used with single throw or double throw momentary switches
- Supports unlimited number of N/O switches connected in parallel

Dual Channel Model

- Purpose designed for use with Imtra 2-wire single and 3-wire bi-color PowerLEDs
- Operate 2 channels independently or in “paired” mode for controlling both channels in unison (14A total capacity)
- Dims bi-color PowerLEDs with a single momentary switch
- May be used with single throw or double throw momentary switches
- Supports unlimited number of N/O switches connected in parallel

(Dual Channel)

Specifications

Input voltage	10-40VDC	
Power capacity	7A	7A/Channel (14A total)
Control interface	N.O. Contacts	
Control inputs	Momentary switches, 0-10V and 4-20mA Analog	

See our website for dimmer compatibility chart.

INTERVOLT & DMS DIMMERS

Intervolt SLD Switchmode Dimmers

- PWM dimming for halogen and many 2-wire LED products
- Supports unlimited number of N/O momentary switches
- Master/Slave function for unlimited power stacking
- Duodim model operated 2 channels independently or in combined channel mode
- Compatible with Imtra Sigma and AcXent LED fixtures

Intervolt SLD Dimmer

DMS 500/850 Series Digital Dimmers

- High frequency PWM delivers flicker-free lighting at all levels
- Smoothly dims most LED bulbs as well as flexible or rigid LED strips
- Compatible with Imtra, Sigma, AcXent and most 2-wire LEDs
- Can be controlled with a variety of input devices including momentary switches
- Accepts 0-10V (source) input signal from centralized control systems
- Simple synchronization of multiple units for controlling larger loads

DMS-500

DMS-850

Specifications

	SLD2040DC	SLD2040DD	SLD2550DC	DMS-500	DMS-850
Input voltage	9-33VDC			6-30VDC	
Power capacity	16.7A		21A	5A	8.5A
Power stacking	Yes	No	Yes	Yes	
Standby current	>10mA			<1.0mA	
Complete Off	Yes			Yes	
Control interface	N/O push-button			N/O push-button or Potentiometer	
Ingress protection (IP)	IP40			IP20

CONVERTERS

Key Features & Benefits

- AC/DC converters for LEDs and sensitive electronics
- Provides stable voltage regulation and protection against damaging spikes
- Overload, over-current, under/over voltage, thermal, and RFI protections
- Visit www.imtra.com for a complete list of models and specifications

AC/DC LED Converter

INTERVOLT POWER CONDITIONERS

Voltage Transient Protection & LED Lighting

All Imtra manufactured LED light fixtures and most of our distributed products incorporate the use of transient voltage suppression diodes for the purpose of protecting the IC (integrated circuit) against high voltage spikes and transients. Although lasting only milliseconds, transients will damage sensitive electronics and LED lights that do not have adequate voltage suppression as part of their architecture.

This is the case with many non-marine LED products including commodity products such as LED rope light and LED tape light. As a precaution when using these products on boats, we high recommend the use of power conditioners (aka voltage stabilizers).

Imtra offers a range of Intervolt Power Conditioners for protection of sensitive electronics and LED lighting against voltage dips, spikes and transients.

SVS Voltage Stabilizer

SPCi Mini Power Conditioner

SPCi Power Conditioner Gen II

Specifications

	12V SVS	24V SVS	12VDC SPCi Mini, 7A	24V SPCi Mini, 5A	12VDC SPCi Gen II, 20A	24VDC SPCi Gen II, 20A

SEARCHLIGHTS & NAVIGATION LIGHTS

Since 1922, Den Haan Rotterdam (DHR) has manufactured high-quality lighting equipment for the maritime industry. DHR searchlights adopt the most advanced LED technology available, utilizing materials that can stand up to the harsh weather conditions at sea.

Rugged and compact, combining style and functionality, DHR searchlights and navigation lights are the perfect solution for recreational and commercial vessels.

D H R N A V I G A T I O N L I G H T S & S E A R C H L I G H T S

DHR 40 LED

- Compact navigation light for small vessels
- Excellent visibility characteristics at high vertical angles
- Flashing option
- 50,000 hour lifetime with no interference noise
- Available with base, side and pipe mounting

Materials

Black, hard anodized seawater-resistant aluminum
 POM base, borosilicate glass lens, Epoxy potted LED driver

DHR 150 / DHR 180

- Compact searchlight suitable for low-height vessels
- Ball joint cabin control used for operation from the wheelhouse
- Clear white beam

Materials

Brushed stainless steel 316 housing
 Chrome plated brass handle (DHR 180)
 All other materials corrosion resistant and non-magnetic

DHR 230RCB Series

- Family of LED searchlights with compact design
- Perfect for tugs, workboats and inland vessels
- Silver plated mirror provides optimal beam
- Operated by a control panel, usually mounted in the wheelhouse

Materials

Brushed stainless steel 316L housing
 All other materials corrosion resistant and non-magnetic

VIMAR
Modular Switching System

Download a Vimar catalog at www.imtra.com.

Imtra is the supplier of choice for the marine industry's most popular decorative switching system. Designed and manufactured in Italy, Vimar® switching is available in three distinct collections: Idea, Eikon and Arké. Each series boasts over 200 functions (switches, dimmers, outlets, sockets, etc.) with dozens of cover plate choices in a variety of configurations, colors and materials. For the ultimate in on-board lighting command and control, Vimar's By-me Marine® automated control system is user-friendly, easy to program, and simple to install and maintain.

IP Ratings

The IP rating (Ingress Protection Rating) designates the amount of dust or fluid an electronic/electrical enclosure allows to pass through into the product. The rating applies to any enclosure that provides protection of equipment from certain external influences and in any direction, along with protection against direct contact.

- IP20** (2) Protected against penetration of solids larger than 12mm and (0) not protected against liquids
- IP40** (4) Protected against penetration of solids larger than 1mm and (0) not protected against liquids
- IP50** (5) Protected against dust and (0) not protected against liquids
- IP55** (5) Resistant to dust penetration and (5) protected against jets of water from every direction
- IP65** (6) Completely protected against dust and (5) protected against jets of water from every direction
- IP67** (6) Completely protected against dust and (7) protected against immersion (30 minutes, 1m+ depth)

Warranty & Reliability

At its discretion, Imtra will either replace or repair any product in this catalog within its specified warranty period if found to be defective through faulty material or workmanship provided that no attempt has been made by the customer to tamper with, rectify, dismantle, or alter the product in any way. The warranty periods for most products are specified in the preceding catalog pages and commence upon delivery of the goods. Warranty periods listed in this catalog refer to electronic functionality only. If not defined in the catalog, please locate detailed warranty information on any specific product by downloading that product's installation manual directly off our website. Imtra specifically disclaims any implied warranties, merchantability or fitness for a specific purpose and will not be liable for any direct, indirect, incidental or consequential damages. Imtra's total liability is limited to repair or replacement of the product. The warranty set forth above is inclusive and no other warranty, whether written or oral, is expressed or implied. If it should become necessary to return a fixture for service during or beyond the warranty period, please refer to Imtra's standard Return Policy as detailed on Imtra's website (www.imtra.com) or call Imtra customer service at (508) 995-7000. No returns will be accepted without a Return Authorization (RA) number.

Classification Symbols

Imtra lighting products are designed to meet international standards and classifications. Symbols identifying these classifications are:

- | | |
|---|--|
| European Conformity Mark of Approval | Meets or Exceeds FCC Standards |
| Compliant to Restrictions of Hazardous Substances Directive | ABS Design Assessed |
| Suitable to Inflammable Surfaces | C-Tick Safety Mark |
| Class 3 | Russian Maritime Register of Shipping Certified |
| Class 1 | Tested & Approved by Det Norske Veritas |
| Tested and Approved by ETL to meet U.L. Standards | Certified to Applicable Public Health & Safety Standards |
| Tested and Approved by U.L. to meet U.L. Standards | Tested & Approved by TUV Labs |
| Trade Agreement Act Compliant | USDA Compliant |
| ANSI-ASQ National Accreditation Board | Designed & Assembled in the U.S.A. |

The Imtra Learning Center

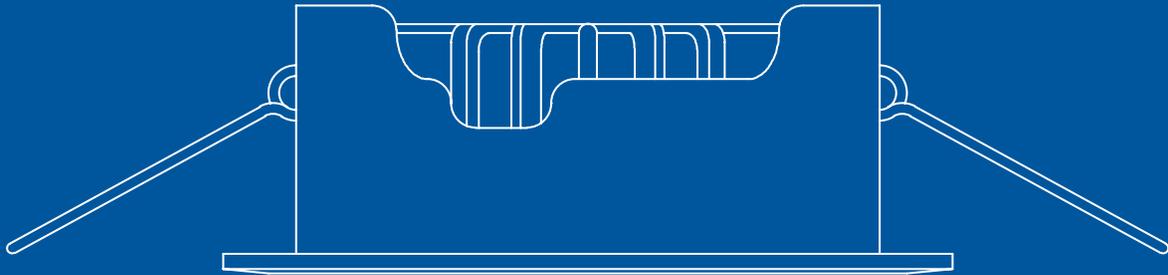

The Imtra Learning Center is a great resource for finding answers to your questions regarding marine equipment. Everything from thruster and windlass selection guides to articles comparing LED and halogen lighting to fins vs. gyro stabilizers and more can be found in the Learning Center. It's always being updated, so be sure to check in regularly! Go to www.imtralearningcenter.com.
