

# Chine interceptor mounting positions when chine angle deviates from 20 degrees

$>20^\circ$

- Long edge parallel with hull
- Max 6mm gap between tip and down to chine edge → **23.5 degrees** chine angle

$<20^\circ$

- Long edge parallel with hull
- Blade tip should tangent chine edge
- Length of chine has to be longer than 100mm
- Max 6mm gap between blade corner and down to chine edge → **16 degrees** chine angle
