

The SPCi GEN II Maxi Series are, in fact, a converter, stabiliser, isolator and regulator with the added advantage of galvanic isolation. With digital over analogue topology the GEN II range allows the installer/operator to control and monitor various functions and provides valuable feedback on the status of the connected load.

\* Based on a 50% duty cycle at 5 minute intervals over and above the continuous load rating.

\*\* Based on a peak surge rating of 5 seconds over and above the continuous load rating.

\*\*\* Battery charger mode only
